

Compact, fully automatic splicing device

## Technical description

The Fiberfox MINI6S+ Premium splicer features a very good price/performance ratio and is one of the most powerful and robust splicing devices on the market. The splicer is water-protected, dust-proof and shock-proof, which makes it a reliable working tool even for use in harsh environments. The automatic, precise fiber core alignment supported by the AOCAT system (Automatic Optical Core Analysis & Tracking) achieves a fast splice time of only 6 seconds. The device comes with above-average accessories such as two rechargeable batteries, the crimp splice press incl. special holder, which is important in Germany. Interchangeable holders make it easy to get started with splicing technology. These holders can also be used in the included high-end Cleaver.

Core centering AOCAT (Automatic Optical Core Analysis & Tracking System)  
4.3" color LCD touch screen  
LED Injection System (keine Spiegel)  
Holder for SOC connector  
2 batteries  
Transport case with work surface  
Compact design
