

# ELIT

Grounding point with 1m round steel Ø12mm finished termite welded to 5m 50mm<sup>2</sup> halogen free G/G XLPO

## Technical description

ELIT JP-Ø12-50mm<sup>2</sup>-5m-CuWire is a grounding point with many applications. Used, among other things, for grounding reinforcement by electrically welding the steel bar to the reinforcement. The earthing point consists of a 50mm<sup>2</sup> Cu-wire with a length of 5m which is termite welded to a round steel rod with a diameter of Ø12mm and a length of 1m.

## Advantages:

Provides a very simple, fast and good connection to reinforcement  
Quick and easy earthing ready for use  
5m termite welded halogen free cable for connection
