

ELIT KK024-5P-32A-450V

Universal quick connect terminal for 0.2-4mm² cable 32A 450V

Technical description

A universal 5-pole connection terminal for use in installations where wires are to be connected together in a quick, safe and easy way. The terminal handles both single-wire and multi-wire wire cross-sections from 0.2-4mm² by first pushing out the termination pin, pushing in the cable and then pushing in the termination pin. This locks the wire completely in place with a very good contact surface and allows use up to 32A. This solution also prevents the risk that the terminal can inadvertently open again when pushed into the junction box. The terminal takes up little space and is only 12mm high. The terminal is also available in 2- and 3-pole versions.

Advantages:

Fast and safe connection of 5 conductors from 0.2-4mm²
Termination pin that cannot open in the junction box
Easy to assemble and disassemble

Product name/ Art.nr/ GTIN	ELIT KK024-5P-32A-450V/ 22500002/ 7070810032730
According to:	---
Number of clamp positions	5
Nominal cross section	0,2 - 4 Square millimetre
With operation lever	Yes
Colour	Other
Transparent	Yes
Nominal voltage	450 Volt
Nominal current	32 Ampere
Suitable for solid conductors	Yes
Suitable for flexible conductors	Yes
Suitable for multi-wire conductors	Yes
