

ELIT KSH58M

Conical coupler for 5/8 "copper-plated earth rods

Technical description

A conical coupler made for 5/8 "earth rods. The coupling takes place automatically when the earth rods are driven down and the joint is 100% tight.

Provides good, safe and corrosion-proof joints with low electrical resistance.

The compression coupler is delivered in Brass with a conductivity similar to pure copper. The coupler has high protection against corrosion.

Advantages:

Easy splicing of earth spikes

Provides tight joints that prevent corrosion

Provides good electrical contact

Product name/ Art.nr/ GTIN	ELIT KSH58M/ 30100001/ 7070810020744
According to:	---
Construction type	Connection sleeve
Diameter earthing connection	14,2 - 14,2 Millimetre
Connecting hole	14,2 Millimetre
Material	Brass
Surface protection	Untreated
