

ELIT DH58

Drive sleeve for protection of earth rods during driving into ground

Technical description

The drive sleeve is an auxiliary tool for driving down ground rods without damaging or deforming the earth rods ends. Construction is in high quality hardened steel and provides robust and perfect down force.

Advantages:

Protects the ground rods during driving into the ground
Solid, hardened and can be used for numerous times
Available in different ground rod diameters

Product name/ Art.nr/ GTIN		ELIT DH58/ 30100002/ 7070810000937
According to:		---
Model		Impact head
Diameter earthing pin		14 - 14,5 Millimetre
Material		Steel
Surface protection		Other
