

ELIT DHSDSMAX58-34

Impact piece 5/8 "with SDS Max for driving 5/8" and 3/4" earth rods into the ground

Technical description

ELIT DHSDSMAX58 is a tool with SDS Max attachment that makes it possible to mechanically drive earth rods with a diameter of 5/8" and 3/4" into the ground. The specially designed sleeve that is placed on top of the earth rod prevents the top of the earth rod from being damaged and coupler, pigtail and hammerlock can be fitted after driving the rod down. Fits all tools with SDS Max attachment, but the machine should be of a certain size so driving will be quick.

Advantages:

Does not damage the ground rod during driving
Less physical work during driving
Fits all machines with SDS Max mounting

Product name/ Art.nr/ GTIN	ELIT DHSDSMAX58-34/ 30100011/ 7070811212544
According to:	---
Model	Impact head
Diameter earthing pin	14 - 17,3 Millimetre
Material	Steel
Surface protection	Other
Suitable for holding shaft type	Other
